Location-Based Management for Construction: Planning, scheduling and control

Russell Kenley, Olli Seppänen

Location-Based Management for Construction: Planning, scheduling and control Russell Kenley, Olli Seppänen

With extensive case studies for illustration, this is a practitioner's guide to an entirely new production system for construction management using flowline scheduling.

Covering the entire process of presenting a comprehensive management system – from design, through measurement, scheduling, and visualization and control – its emphasis is on reducing cost and increasing quality.

Drawing its components together into a management system, the authors not only include theory and explanations of how and why it works, but also examine and present a suite of methods for successful project implementation.

Perfect as a how-to guide for researchers and advanced construction students to discover the simple application of the new techniques, and invaluable for acquiring the practical tools for planning and controlling projects.
