Open Networked "i-Learning": Models and Cases of "Next-Gen" Learning

Open Source Applications Springer Book Series Editor: Ernesto Damiani, University of Milan, Italy
<http://sesar.dti.unimi.it/ossbook/>

A new overall interdisciplinary framework called "i learning" integrates managerial organization and technology aspects also known as "technology enhanced learning". *Open Networked "i Learning": Models and Cases of "Next-Gen" Learning* begins its investigation with the important changes that have recently occurred within the management, technology and society fields. Social and cultural aspects of society that influence the "dynamics" and the "styles" of the learning processes are presented as well. The last section of this edited volume focuses on possible future scenarios of the learning processes by describing the main models, processes, tools, technologies, and involved organizations.

Open Networked "i Learning": Models and Cases of "Next-Gen" Learning is suitable for advanced undergraduate and graduate level students and professors concentrating on computer science, engineering and business management as a secondary text or reference book. Professionals and researchers who work in the related industry of technology enhanced learning will find this book useful as well.
