Relating Software Requirements and Architectures

Relating Software Requirements and Architectures

Why have a book about the relation between requirements and software architecture? Understanding the relation between requirements and architecture is important because the requirements, be they explicit or implicit, represent the function, whereas the architecture determines the form. While changes to a set of requirements may impact on the realization of the architecture, choices made for an architectural solution may impact on requirements, e.g., in terms of revising functional or non-functional requirements that cannot actually be met.

Although research in both requirements engineering and software architecture is quite active, it is in their combination that understanding is most needed and actively sought. Presenting the current state of the art is the purpose of this book. The editors have divided the contributions into four parts: Part 1 “Theoretical Underpinnings and Reviews” addresses the issue of requirements change management in architectural design through traceability and reasoning. Part 2 “Tools and Techniques” presents approaches, tools, and techniques for bridging the gap between software requirements and architecture. Part 3 “Industrial Case Studies” then reports industrial experiences, while part 4 on “Emerging Issues” details advanced topics such as synthesizing architecture from requirements or the role of middleware in architecting for non-functional requirements. The final chapter is a conclusions chapter identifying key contributions and outstanding areas for future research and improvement of practice.

The book is targeted at academic and industrial researchers in requirements engineering or software architecture. Graduate students specializing in these areas as well as advanced professionals in software development will also benefit from the results and experiences presented in this volume.

From reader reviews:

Myrtle Anderson:

Have you spare time for just a day? What do you do when you have considerably more or little spare time? That's why, you can choose the suitable activity with regard to spend your time. Any person spent all their spare time to take a wander, shopping, or went to the actual Mall. How about open or perhaps read a book titled Relating Software Requirements and Architectures? Maybe it is for being best activity for you. You already know beside you can spend your time along with your favorite's book, you can cleverer than before. Do you agree with the opinion or you have different opinion?

Kathryn Botello:

The book Relating Software Requirements and Architectures can give more knowledge and also the precise product information about everything you want. Why must we leave a good thing like a book Relating Software Requirements and Architectures? Some of you have a different opinion about reserve. But one aim which book can give many data for us. It is absolutely right. Right now, try to closer using your book. Knowledge or info that you take for that, you could give for each other; you could share all of these. Book Relating Software Requirements and Architectures has simple shape however, you know: it has great and massive function for you. You can seem the enormous world by wide open and read a publication. So it is very wonderful.

Stacey Williams:

Now a day people that Living in the era just where everything reachable by match the internet and the resources included can be true or not call for people to be aware of each info they get. How many people to be smart in having any information nowadays? Of course the answer is reading a book. Reading through a book can help people out of this uncertainty Information especially this Relating Software Requirements and Architectures book because book offers you rich details and knowledge. Of course the knowledge in this book hundred per-cent guarantees there is no doubt in it you may already know.

Rex Pelkey:

As a student exactly feel bored for you to reading. If their teacher inquired them to go to the library or make summary for some e-book, they are complained. Just little students that has reading's heart or real their leisure activity. They just do what the educator want, like asked to go to the library. They go to generally there but nothing reading very seriously. Any students feel that studying is not important, boring and also can't see colorful photos on there. Yeah, it is to get complicated. Book is very important for you personally. As we know that on this period, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore , this Relating Software Requirements and Architectures can make you sense more interested to read.
