Moving People, Goods and Information in the 21st Century: The Cutting-Edge Infrastructures of Networked Cities (Networked Cities Series) Richard E. Hanley

Globalisation and technological innovation have changed the way people, goods, and information move through and about cities. To remain, or become, economically and environmentally sustainable, cities and their regions must adapt to these changes by creating cutting-edge infrastructures that integrate advanced technologies, communications, and multiple modes of transportation. The book defines cutting-edge infrastructures, details their importance to cities and their regions, and addresses the obstacles to creating those infrastructures.
