Risk Management Technologies: With Logic and Probabilistic Models: 20 (Topics in Safety, Risk, Reliability and Quality) E.D. Solozhentsev

This book presents intellectual, innovative, information technologies (I³-technologies) based on logical and probabilistic (LP) risk models. The technologies presented here consider such models for structurally complex systems and processes with logical links and with random events in economics and technology. The volume describes the following components of risk management technologies: LP-calculus; classes of LP-models of risk and efficiency; procedures for different classes; special software for different classes; examples of applications; methods for the estimation of probabilities of events based on expert information. Also described are a variety of training courses in these topics.

The classes of risk models treated here are: LP-modeling, LP-classification, LP-efficiency, and LP-forecasting. Particular attention is paid to LP-models of risk of failure to resolve difficult economic and technical problems. Amongst the discussed procedures of I³-technologies are the construction of LP-models, LP-identification of risk models; LP-risk analysis, LP-management and LP-forecasting of risk. The book further considers LP-models of risk of invalidity of systems and processes in accordance with the requirements of ISO 9001-2008, LP-models of bank operational risks in accordance with the requirements of Basel-2, complex risk LP-models for preventing ammunition depot explosions, enterprise electric power supply systems, debugging tests of technical systems, etc. The book also considers LP-models of credit risks, securities portfolios, operational risks in banking, conetration of bribes and corruption, etc.

A number of applications is given to show the effectiveness of risk management technologies. In addition, topics of lectures and practical computer exercises intended for a two-semester course "Risk management technologies" are suggested.

From reader reviews:

Jeff Williams:

Do you certainly one of people who can't read gratifying if the sentence chained inside the straightway, hold on guys this particular aren't like that. This Risk Management Technologies: With Logic and Probabilistic Models: 20 (Topics in Safety, Risk, Reliability and Quality) book is readable by means of you who hate those straight word style. You will find the info here are arrange for enjoyable reading experience without leaving actually decrease the knowledge that want to deliver to you. The writer connected with Risk Management Technologies: With Logic and Probabilistic Models: 20 (Topics in Safety, Risk, Reliability and Quality) content conveys prospect easily to understand by many individuals. The printed and e-book are not different in the content but it just different available as it. So , do you even now thinking Risk Management Technologies: With Logic and Probabilistic Models: 20 (Topics in Safety, Risk, Reliability and Quality) is not loveable to be your top checklist reading book?

Katrina Frey:

Information is provisions for folks to get better life, information today can get by anyone on everywhere. The information can be a know-how or any news even a problem. What people must be consider when those information which is in the former life are challenging be find than now could be taking seriously which one is appropriate to believe or which one typically the resource are convinced. If you get the unstable resource then you understand it as your main information it will have huge disadvantage for you. All those possibilities will not happen throughout you if you take Risk Management Technologies: With Logic and Probabilistic Models: 20 (Topics in Safety, Risk, Reliability and Quality) as the daily resource information.

David Mandujano:

Typically the book Risk Management Technologies: With Logic and Probabilistic Models: 20 (Topics in Safety, Risk, Reliability and Quality) has a lot details on it. So when you make sure to read this book you can get a lot of gain. The book was compiled by the very famous author. The author makes some research ahead of write this book. This kind of book very easy to read you will get the point easily after reading this article book.

Christopher Wilkerson:

Exactly why? Because this Risk Management Technologies: With Logic and Probabilistic Models: 20 (Topics in Safety, Risk, Reliability and Quality) is an unordinary book that the inside of the publication waiting for you to snap that but latter it will surprise you with the secret the item inside. Reading this book next to it was fantastic author who else write the book in such remarkable way makes the content interior easier to understand, entertaining technique but still convey the meaning entirely. So , it is good for you for not hesitating having this ever again or you going to regret it. This excellent book will give you a lot of advantages than the other book possess such as help improving your proficiency and your critical thinking

method. So , still want to delay having that book? If I had been you I will go to the reserve store hurriedly.
