Flexible Imputation of Missing Data (Chapman & Hall/CRC Interdisciplinary Statistics) Stef van Buuren

Missing data form a problem in every scientific discipline, yet the techniques required to handle them are complicated and often lacking. One of the great ideas in statistical science—multiple imputation—fills gaps in the data with plausible values, the uncertainty of which is coded in the data itself. It also solves other problems, many of which are missing data problems in disguise.

Flexible Imputation of Missing Data is supported by many examples using real data taken from the author's vast experience of collaborative research, and presents a practical guide for handling missing data under the framework of multiple imputation. Furthermore, detailed guidance of implementation in R using the author's package MICE is included throughout the book.

Assuming familiarity with basic statistical concepts and multivariate methods, **Flexible Imputation of Missing Data** is intended for two audiences:

- (Bio)statisticians, epidemiologists, and methodologists in the social and health sciences
- Substantive researchers who do not call themselves statisticians, but who possess the necessary skills to understand the principles and to follow the recipes

This graduate-tested book avoids mathematical and technical details as much as possible: formulas are accompanied by a verbal statement that explains the formula in layperson terms. Readers less concerned with the theoretical underpinnings will be able to pick up the general idea, and technical material is available for those who desire deeper understanding. The analyses can be replicated in R using a dedicated package developed by the author.

From reader reviews:

Eddie Nelson:

Why don't make it to become your habit? Right now, try to ready your time to do the important take action, like looking for your favorite publication and reading a book. Beside you can solve your long lasting problem; you can add your knowledge by the reserve entitled Flexible Imputation of Missing Data (Chapman & Hall/CRC Interdisciplinary Statistics). Try to stumble through book Flexible Imputation of Missing Data (Chapman & Hall/CRC Interdisciplinary Statistics) as your pal. It means that it can to be your friend when you really feel alone and beside that of course make you smarter than before. Yeah, it is very fortunated to suit your needs. The book makes you a lot more confidence because you can know every little thing by the book. So , we should make new experience in addition to knowledge with this book.

Jaelyn Utecht:

Book is to be different per grade. Book for children until finally adult are different content. We all know that that book is very important normally. The book Flexible Imputation of Missing Data (Chapman & Hall/CRC Interdisciplinary Statistics) ended up being making you to know about other expertise and of course you can take more information. It is rather advantages for you. The reserve Flexible Imputation of Missing Data (Chapman & Hall/CRC Interdisciplinary Statistics) is not only giving you more new information but also for being your friend when you feel bored. You can spend your own personal spend time to read your e-book. Try to make relationship while using book Flexible Imputation of Missing Data (Chapman & Hall/CRC Interdisciplinary Statistics). You never truly feel lose out for everything in case you read some books.

Antonio Fells:

Often the book Flexible Imputation of Missing Data (Chapman & Hall/CRC Interdisciplinary Statistics) will bring you to definitely the new experience of reading a book. The author style to spell out the idea is very unique. If you try to find new book to learn, this book very ideal to you. The book Flexible Imputation of Missing Data (Chapman & Hall/CRC Interdisciplinary Statistics) is much recommended to you to see. You can also get the e-book from your official web site, so you can quickly to read the book.

Aurora Ammon:

What is your hobby? Have you heard that will question when you got students? We believe that that query was given by teacher to their students. Many kinds of hobby, All people has different hobby. And you also know that little person such as reading or as reading become their hobby. You must know that reading is very important as well as book as to be the factor. Book is important thing to include you knowledge, except your current teacher or lecturer. You will find good news or update about something by book. Many kinds of books that can you take to be your object. One of them is niagra Flexible Imputation of Missing Data (Chapman & Hall/CRC Interdisciplinary Statistics).
