## European Security: Nuclear or Conventional Defence?

European Security: Nuclear or Conventional Defence? documents the proceedings of the IVth International Symposium held in Geneva on December 8-10, 1983.

This book compiles papers on the INF negotiations on intermediate-range nuclear missiles in Europe and START talks on strategic nuclear arms, focusing on four themes- nuclear threats, public reactions, arms race and arms control, and alternative paths.

The topics discussed include consequences in Europe of a nuclear conflict; expected impact of the use of nuclear weapons on battlefields, towns, and cities; peace movements in Europe; and Europe and non-violent defense. The aims, roles and prospects of arms control; problem of conventional defense; risk of nuclear war; and nuclear disarmament are also deliberated in this text.

This publication is a good source for students and researchers aiming to acquire knowledge of the possible consequences of a nuclear conflict in Europe.
