A contrarian look at how Warren Buffett thinks about investing and related issues

Warren Buffett is the most successful and revered investor of all time. His ability to consistently find undervalued companies has made him one of the world's richest men.

Despite many previous books about him, it's rare to find an objective assessment—one that praises him when appropriate, but also recognizes that even Buffett makes mistakes. For instance, is he right to call for higher taxes and an end to earnings guidance? Should Buffett fans copy his avoidance of technology stocks?

In this penetrating look at how Buffett thinks, Vahan Janjigian shows readers how to learn from the master's best moves while avoiding strategies that don't apply to small investors. And he explains Buffett's favorite valuation methodology, the discounted cash flow model, and how it can significantly reduce the odds of overpaying for a stock.
