Big Fat Liars: How Politicians, Corporations, and the Media use Science and Statistics To Manipulate the Public Morris E. Chafetz

These days, you can't turn on a television without hearing that you're probably fat, engaged in unhealthy behavior, failing to get sufficient exercise, destroying the environment through the use of practically every product that makes your life more convenient, and likely to fall victim to just about everything and everyone around you. But not only are the statistics that prove these points based on false information, much of our national dialogue is dictated by this patently bad science—encouraged solely by public and private organizations that leverage these demonstrably untrue facts to bolster their own philosophies and fatten their own pocketbooks. With mounds of solid evidence that contradicts common thought, Morris Chafetz shows the lies behind the facts about today's big issues (for instance, the "obesity epidemic" we hear so much about is the result not of a fatter population but instead a change in bookkeeping in a federal agency, and the evidence used now to frighten us about "global warming" was used a generation ago to frighten us about "global cooling") and encourages readers to look through the money-motivated façade of statistics and government controls and return to a strong attitude of personal responsibility.

It should be here for you. So , don't miss it! Just read this e-book kind for your better life in addition to knowledge.

Ruth Davis:

As a scholar exactly feel bored in order to reading. If their teacher asked them to go to the library in order to make summary for some guide, they are complained. Just tiny students that has reading's internal or real their passion. They just do what the trainer want, like asked to the library. They go to presently there but nothing reading seriously. Any students feel that reading through is not important, boring and also can't see colorful pics on there. Yeah, it is to be complicated. Book is very important for you. As we know that on this time, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore , this Big Fat Liars: How Politicians, Corporations, and the Media use Science and Statistics To Manipulate the Public can make you experience more interested to read.

Sylvia Medina:
