Fundamentals of Probability: A First Course (Springer Texts in Statistics) Anirban DasGupta

Probability theory is one branch of mathematics that is simultaneously deep and immediately applicable in diverse areas of human endeavor. It is as fundamental as calculus. Calculus explains the external world, and probability theory helps predict a lot of it. In addition, problems in probability theory have an innate appeal, and the answers are often structured and strikingly beautiful. A solid background in probability theory and probability models will become increasingly more useful in the twenty-first century, as difficult new problems emerge, that will require more sophisticated models and analysis. This is a text on the fundamentals of the theory of probability at an undergraduate or first-year graduate level for students in science, engineering, and economics. The only mathematical background required is knowledge of univariate and multivariate calculus and basic linear algebra. The book covers all of the standard topics in basic probability, such as combinatorial probability, discrete and continuous distributions, moment generating functions, fundamental probability inequalities, the central limit theorem, and joint and conditional distributions of discrete and continuous random variables. But it also has some unique features and a forward-looking feel.

From reader reviews:

Deborah Tate:

In this 21st century, people become competitive in every way. By being competitive at this point, people have to do something to make these people survive, being in the middle of the actual crowded place and notice simply by surrounding. One thing that occasionally many people have underestimated it for a while is reading. That's why, by reading a publication your ability to survive increase then having chance to endure than other is high. For you who want to start reading the book, we give you this specific Fundamentals of Probability: A First Course (Springer Texts in Statistics) book as basic and daily reading publication. Why, because this book is more than just a book.

Richard Perkins:

Reading a publication can be one of a lot of action that everyone in the world enjoys. Do you like reading book thus. There are a lot of reasons why people love it. First reading a guide will give you a lot of new facts. When you read a guide you will get new information since book is one of many ways to share the information or perhaps their idea. Second, examining a book will make you more imaginative. When you studying a book especially fictional book the author will bring one to imagine the story how the personas do it anything. Third, you may share your knowledge to other folks. When you read this Fundamentals of Probability: A First Course (Springer Texts in Statistics), you may tell your family, friends in addition to soon about your e-book. Your knowledge can inspire different ones, make them reading a publication.

Yvonne Webb:

The reserve untitled Fundamentals of Probability: A First Course (Springer Texts in Statistics) is the reserve that recommended to you to learn. You can see the quality of the reserve content that will be shown to an individual. The language that creator use to explain their way of doing something is easily to understand. The article writer was did a lot of exploration when write the book, therefore the information that they share to you is absolutely accurate. You also will get the e-book of Fundamentals of Probability: A First Course (Springer Texts in Statistics) from the publisher to make you considerably more enjoy free time.

Robert Russell:

What is your hobby? Have you heard this question when you got pupils? We believe that that query was given by teacher on their students. Many kinds of hobby, Everyone has different hobby. And you also know that little person including reading or as examining become their hobby. You should know that reading is very important along with book as to be the issue. Book is important thing to increase your knowledge, except your personal teacher or lecturer. You see good news or update in relation to something by book. Different categories of books that can you decide to try be your object. One of them is niagra Fundamentals of Probability: A First Course (Springer Texts in Statistics).
