Advances in aquaculture hatchery technology: 14. Sea cucumber aquaculture: hatchery production, juvenile growth and industry challenges (Woodhead Publishing ... in Food Science, Technology and Nutrition) A. Mercier, J.-F. Hamel

Sea cucumber fisheries have existed for centuries, driven primarily by the Chinese markets. In recent decades, overfishing has severely depleted commercial sea cucumber populations worldwide. Consequently, a growing number of countries are becoming interested in developing aquaculture programs. Every year billions of larvae and millions of juveniles are successfully grown in aquaculture facilities and new initiatives are booming. Here we introduce briefly the main species that have so far been successfully cultivated: *Apostichopus japonicus*, *Holothuria scabra* and *Isostichopus fuscus*. We describe common techniques for the culture of larvae and juveniles and outline some of the main challenges of this industry.
