Preserving Rural Australia: Issues and Solutions A Robertson, R Watts

Scientific knowledge alone will not help countries achieve sustainable management of land, water and biota. Everyone now realises that a partnership is needed between land and water users, scientists, managers and the community if countries are to achieve the goal of preserving rural resources.

This book deals with broad issues relating to resource decline and how different groups such as farmers, rural town dwellers, resource managers and government deal with these issues from social, economic and ecological points of view.
