Spatial Analysis Along Networks: Statistical and Computational Methods (Statistics in Practice)

Atsuyuki Okabe, Kokichi Sugihara

In the real world, there are numerous and various events that occur on and alongside networks, including the occurrence of traffic accidents on highways, the location of stores alongside roads, the incidence of crime on streets and the contamination along rivers. In order to carry out analyses of those events, the researcher needs to be familiar with a range of specific techniques. Spatial Analysis Along Networks provides a practical guide to the necessary statistical techniques and their computational implementation.

Each chapter illustrates a specific technique, from Stochastic Point Processes on a Network and Network Voronoi Diagrams, to Network K-function and Point Density Estimation Methods, and the Network Huff Model. The authors also discuss and illustrate the undertaking of the statistical tests described in a Geographical Information System (GIS) environment as well as demonstrating the user-friendly free software package SANET.

Spatial Analysis Along Networks:

- Presents a much-needed practical guide to statistical spatial analysis of events on and alongside a network, in a logical, user-friendly order.
- Introduces the preliminary methods involved, before detailing the advanced, computational methods, enabling the readers a complete understanding of the advanced topics.
- Dedicates a separate chapter to each of the major techniques involved.
- Demonstrates the practicalities of undertaking the tests described in the book, using a GIS.
- Is supported by a supplementary website, providing readers with a link to the free software package SANET, so they can execute the statistical methods described in the book.

Students and researchers studying spatial statistics, spatial analysis, geography, GIS, OR, traffic accident analysis, criminology, retail marketing, facility management and ecology will benefit from this book.

From reader reviews:

Theodore May:

Information is provisions for folks to get better life, information today can get by anyone on everywhere. The information can be a expertise or any news even a concern. What people must be consider while those information which is from the former life are hard to be find than now could be taking seriously which one is appropriate to believe or which one the actual resource are convinced. If you obtain the unstable resource then you buy it as your main information there will be huge disadvantage for you. All those possibilities will not happen within you if you take Spatial Analysis Along Networks: Statistical and Computational Methods (Statistics in Practice) as your daily resource information.

Victoria Schwan:

People live in this new morning of lifestyle always make an effort to and must have the time or they will get wide range of stress from both everyday life and work. So , if we ask do people have free time, we will say absolutely sure. People is human not just a robot. Then we question again, what kind of activity have you got when the spare time coming to you of course your answer will certainly unlimited right. Then do you try this one, reading ebooks. It can be your alternative throughout spending your spare time, the particular book you have read is Spatial Analysis Along Networks: Statistical and Computational Methods (Statistics in Practice).

Edward Florez:

Do you have something that you want such as book? The reserve lovers usually prefer to opt for book like comic, small story and the biggest one is novel. Now, why not striving Spatial Analysis Along Networks: Statistical and Computational Methods (Statistics in Practice) that give your enjoyment preference will be satisfied by simply reading this book. Reading practice all over the world can be said as the opportunity for people to know world far better then how they react when it comes to the world. It can't be claimed constantly that reading routine only for the geeky particular person but for all of you who wants to become success person. So , for every you who want to start reading through as your good habit, it is possible to pick Spatial Analysis Along Networks: Statistical and Computational Methods (Statistics in Practice) become your personal starter.

Henry Taylor:

Many people spending their moment by playing outside together with friends, fun activity along with family or just watching TV 24 hours a day. You can have new activity to invest your whole day by studying a book. Ugh, do you think reading a book can actually hard because you have to bring the book everywhere? It all right you can have the e-book, bringing everywhere you want in your Smart phone. Like Spatial Analysis Along Networks: Statistical and Computational Methods (Statistics in Practice) which is having the e-book version. So , why not try out this book? Let's find.
