Cognitive Radio Technology (Communications Engineering)

Cognitive Radio Technology (Communications Engineering)

Cognitive radio technology is a smarter, faster, and more efficient way to transmit information to and from fixed, mobile, other wireless communication devices. Cognitive radio builds upon software-defined radio technology. A cognitive radio system is 'aware' of its operating environment and automatically adjusts itself to maintain desired communications-it's like having a trained operator 'inside' the radio making constant adjustments for maximum performance. Operating frequency, power output, antenna orientation/beamwidth, modulation, and transmitter bandwidth are just a few of the operating parameters that can automatically be adjusted "on the fly" in a cognitive radio system.

Fette has constructed a cutting-edge volume that hits all of the important issues including research, management, and support. Cognitive techniques will be discussed such as position and network awareness, infrastructure and physical and link layer concerns. Though still a nascent technology, cognitive radio is being pushed by the US military and for mission-critical civilian communications (such as emergency and public safety services).

*The first book on a revolutionary technology that will be critical to military, emergency, and public safety communications

*A multi-contributed volume written by the leaders in this exciting new area

*Describes the location-determination capabilities of cognitive radio (the precise location of all units in a cognitive radio network can be determined in real time)

From reader reviews:

Bobby Bagwell:

Do you have favorite book? In case you have, what is your favorite's book? Book is very important thing for us to learn everything in the world. Each guide has different aim or goal; it means that book has different type. Some people feel enjoy to spend their time for you to read a book. They can be reading whatever they get because their hobby is usually reading a book. Consider the person who don't like reading a book? Sometime, man or woman feel need book after they found difficult problem or exercise. Well, probably you will require this Cognitive Radio Technology (Communications Engineering).

Jay Blanchard:

This book untitled Cognitive Radio Technology (Communications Engineering) to be one of several books that will best seller in this year, that's because when you read this reserve you can get a lot of benefit on it. You will easily to buy this kind of book in the book store or you can order it by means of online. The publisher on this book sells the e-book too. It makes you more easily to read this book, as you can read this book in your Cell phone. So there is no reason to your account to past this reserve from your list.

James Jackson:

This Cognitive Radio Technology (Communications Engineering) is brand-new way for you who has interest to look for some information mainly because it relief your hunger info. Getting deeper you on it getting knowledge more you know or perhaps you who still having little bit of digest in reading this Cognitive Radio Technology (Communications Engineering) can be the light food for you personally because the information inside this particular book is easy to get by anyone. These books create itself in the form that is reachable by anyone, yep I mean in the e-book type. People who think that in reserve form make them feel drowsy even dizzy this reserve is the answer. So there is not any in reading a reserve especially this one. You can find actually looking for. It should be here for a person. So , don't miss the item! Just read this e-book variety for your better life as well as knowledge.

Steven Evans:

E-book is one of source of understanding. We can add our know-how from it. Not only for students but additionally native or citizen have to have book to know the upgrade information of year to be able to year. As we know those books have many advantages. Beside we all add our knowledge, also can bring us to around the world. With the book Cognitive Radio Technology (Communications Engineering) we can have more advantage. Don't one to be creative people? To get creative person must want to read a book. Merely choose the best book that suitable with your aim. Don't end up being doubt to change your life with that book Cognitive Radio Technology (Communications Engineering). You can more pleasing than now.
