Mathematics for Economics (MIT Press) Michael Hoy, John Livernois, Chris McKenna, Ray Rees, Thanasis Stengos

This text offers a comprehensive presentation of the mathematics required to tackle problems in economic analyses. To give a better understanding of the mathematical concepts, the text follows the logic of the development of mathematics rather than that of an economics course. The only prerequisite is high school algebra, but the book goes on to cover all the mathematics needed for undergraduate economics. It is also a useful reference for graduate students. After a review of the fundamentals of sets, numbers, and functions, the book covers limits and continuity, the calculus of functions of one variable, linear algebra, multivariate calculus, and dynamics. To develop the student's problem-solving skills, the book works through a large number of examples and economic applications. This streamlined third edition offers an array of new and updated examples. Additionally, lengthier proofs and examples are provided on the book's website. The book and the web material are cross-referenced in the text. A student solutions manual is available, and instructors can access online instructor's material that includes solutions and PowerPoint slides. Visit http://mitpress.mit.edu/math_econ3 for complete details.

From reader reviews:

Robert Robertson:

Nowadays reading books be than want or need but also be a life style. This reading routine give you lot of advantages. Associate programs you got of course the knowledge the particular information inside the book this improve your knowledge and information. The info you get based on what kind of publication you read, if you want drive more knowledge just go with training books but if you want truly feel happy read one along with theme for entertaining such as comic or novel. Often the Mathematics for Economics (MIT Press) is kind of publication which is giving the reader capricious experience.

Linda Livingston:

The book Mathematics for Economics (MIT Press) has a lot of information on it. So when you read this book you can get a lot of help. The book was written by the very famous author. The writer makes some research prior to write this book. This book very easy to read you can obtain the point easily after reading this article book.

Rosemary Till:

Your reading 6th sense will not betray you actually, why because this Mathematics for Economics (MIT Press) guide written by well-known writer we are excited for well how to make book that could be understand by anyone who also read the book. Written within good manner for you, leaking every ideas and writing skill only for eliminate your own personal hunger then you still skepticism Mathematics for Economics (MIT Press) as good book not merely by the cover but also by content. This is one publication that can break don't evaluate book by its include, so do you still needing an additional sixth sense to pick this particular!? Oh come on your reading through sixth sense already alerted you so why you have to listening to an additional sixth sense.

Martin Hobson:

Guide is one of source of understanding. We can add our know-how from it. Not only for students but also native or citizen need book to know the upgrade information of year to help year. As we know those books have many advantages. Beside most of us add our knowledge, can also bring us to around the world. By book Mathematics for Economics (MIT Press) we can take more advantage. Don't you to definitely be creative people? To become creative person must prefer to read a book. Just simply choose the best book that acceptable with your aim. Don't possibly be doubt to change your life at this book Mathematics for Economics (MIT Press). You can more appealing than now.
