**Fluid Flow, Heat and Mass Transfer at Bodies of Different Shapes: Numerical Solutions** Kuppalapalle Vajravelu, Swati Mukhopadhyay

Most of the equations governing the problems related to science and engineering are nonlinear in nature. As a result, they are inherently difficult to solve. Analytical solutions are available only for some special cases. For other cases, one has no easy means but to solve the problem must depend on numerical solutions.

*Fluid Flow, Heat and Mass Transfer at Bodies of Different Shapes: Numerical Solutions* presents the current theoretical developments of boundary layer theory, a branch of transport phenomena. Also, the book addresses the theoretical developments in the area and presents a number of physical problems that have been solved by analytical or numerical method. It is focused particularly on fluid flow problems governed by nonlinear differential equations. The book is intended for researchers in applied mathematics, physics, mechanics and engineering.

- Addresses basic concepts to understand the theoretical framework for the method
- Provides examples of nonlinear problems that have been solved through the use of numerical method
- Focuses on fluid flow problems governed by nonlinear equations

### **From reader reviews:**

#### **Marni Elliott:**

As people who live in typically the modest era should be change about what going on or information even knowledge to make them keep up with the era that is always change and progress. Some of you maybe will certainly update themselves by looking at books. It is a good choice for you but the problems coming to anyone is you don't know which one you should start with. This Fluid Flow, Heat and Mass Transfer at Bodies of Different Shapes: Numerical Solutions is our recommendation to make you keep up with the world. Why, since this book serves what you want and want in this era.

#### **Marisa Reber:**

Now a day individuals who Living in the era everywhere everything reachable by interact with the internet and the resources inside it can be true or not require people to be aware of each details they get. How a lot more to be smart in acquiring any information nowadays? Of course the reply is reading a book. Looking at a book can help individuals out of this uncertainty Information specially this Fluid Flow, Heat and Mass Transfer at Bodies of Different Shapes: Numerical Solutions book because book offers you rich info and knowledge. Of course the info in this book hundred per-cent guarantees there is no doubt in it as you know.

#### **Janice Martin:**

Spent a free the perfect time to be fun activity to do! A lot of people spent their leisure time with their family, or their own friends. Usually they undertaking activity like watching television, planning to beach, or picnic inside the park. They actually doing ditto every week. Do you feel it? Will you something different to fill your free time/ holiday? Might be reading a book may be option to fill your no cost time/ holiday. The first thing that you'll ask may be what kinds of publication that you should read. If you want to consider look for book, may be the book untitled Fluid Flow, Heat and Mass Transfer at Bodies of Different Shapes: Numerical Solutions can be excellent book to read. May be it is usually best activity to you.

#### **Sandra Jordon:**

Some individuals said that they feel weary when they reading a publication. They are directly felt the item when they get a half elements of the book. You can choose typically the book Fluid Flow, Heat and Mass Transfer at Bodies of Different Shapes: Numerical Solutions to make your current reading is interesting. Your own personal skill of reading skill is developing when you such as reading. Try to choose easy book to make you enjoy to see it and mingle the opinion about book and examining especially. It is to be initial opinion for you to like to available a book and learn it. Beside that the book Fluid Flow, Heat and Mass Transfer at Bodies of Different Shapes: Numerical Solutions can to be your new friend when you're feel alone and confuse using what must you're doing of their time.
