Introduction to Matrices and Vectors (Dover Books on Mathematics)

Jacob T. Schwartz

Introduction to Matrices and Vectors (Dover Books on Mathematics) Jacob T. Schwartz

Realizing that matrices can be a confusing topic for the beginner, the author of this undergraduate text has made things as clear as possible by focusing on problem solving, rather than elaborate proofs. He begins with the basics, offering students a solid foundation for the later chapters on using special matrices to solve problems.

The first three chapters present the basics of matrices, including addition, multiplication, and division, and give solid practice in the areas of matrix manipulation where the laws of algebra do not apply. In later chapters the author introduces vectors and shows how to use vectors and matrices to solve systems of linear equations. He also covers special matrices — including complex numbers, quaternion matrices, and matrices with complex entries — and transpose matrices; the trace of a matrix; the cross product of matrices; eigenvalues and eigenvectors; and infinite series of matrices. Exercises at the end of each section give students further practice in problem solving.

Prerequisites include a background in algebra, and in the later chapters, a knowledge of solid geometry. The book was designed as an introductory text for college freshmen and sophomores, but selected chapters can also be used to supplement advanced high school classes. Professionals who need a better understanding or review of the subject will also benefit from this concise guide.

From reader reviews:

Jordan Sena:

Have you spare time for just a day? What do you do when you have more or little spare time? Yes, you can choose the suitable activity to get spend your time. Any person spent their own spare time to take a walk, shopping, or went to often the Mall. How about open as well as read a book titled Introduction to Matrices and Vectors (Dover Books on Mathematics)? Maybe it is to get best activity for you. You recognize beside you can spend your time along with your favorite's book, you can smarter than before. Do you agree with its opinion or you have additional opinion?

Frances Temple:

Do you have something that you enjoy such as book? The book lovers usually prefer to decide on book like comic, brief story and the biggest an example may be novel. Now, why not trying Introduction to Matrices and Vectors (Dover Books on Mathematics) that give your pleasure preference will be satisfied simply by reading this book. Reading routine all over the world can be said as the opportunity for people to know world far better then how they react to the world. It can't be said constantly that reading addiction only for the geeky individual but for all of you who wants to become success person. So , for all of you who want to start reading through as your good habit, you can pick Introduction to Matrices and Vectors (Dover Books on Mathematics) become your personal starter.

Leslie Yazzie:

A lot of publication has printed but it takes a different approach. You can get it by internet on social media. You can choose the best book for you, science, comedian, novel, or whatever simply by searching from it. It is known as of book Introduction to Matrices and Vectors (Dover Books on Mathematics). You can include your knowledge by it. Without leaving the printed book, it could add your knowledge and make you actually happier to read. It is most significant that, you must aware about guide. It can bring you from one location to other place.

Piedad Trainor:

What is your hobby? Have you heard in which question when you got learners? We believe that that problem was given by teacher to their students. Many kinds of hobby, Everybody has different hobby. And you also know that little person such as reading or as reading become their hobby. You must know that reading is very important and also book as to be the matter. Book is important thing to include you knowledge, except your own personal teacher or lecturer. You see good news or update in relation to something by book. Numerous books that can you choose to use be your object. One of them are these claims Introduction to Matrices and Vectors (Dover Books on Mathematics).
