Statistics (Made Simple Books) H. T. Hayslett

Statistics covers the basic principles of Statistics. The book starts by tackling the importance and the two kinds of statistics; the presentation of sample data; the definition, illustration and explanation of several measures of location; and the measures of variation. The text then discusses elementary probability, the normal distribution and the normal approximation to the binomial. Testing of statistical hypotheses and tests of hypotheses about the theoretical proportion of successes in a binomial population and about the theoretical mean of a normal population are explained. The text then considers testing of hypotheses about the mean of a normal population when the population variance is not known and testing the hypotheses about the mean of populations that are not normal.

The book also describes correlation and regression, confidence limits, non-parametric statistics, and the analysis of variance. The text concludes by giving more complex problems and step-by-step directions for the various statistical tests.

Statisticians and students taking Statistics courses will find the book invaluable.

From reader reviews:

James Ray:

Reading a book for being new life style in this calendar year; every people loves to study a book. When you go through a book you can get a wide range of benefit. When you read guides, you can improve your knowledge, mainly because book has a lot of information on it. The information that you will get depend on what types of book that you have read. If you want to get information about your study, you can read education books, but if you want to entertain yourself you are able to a fiction books, this kind of us novel, comics, and soon. The Statistics (Made Simple Books) provide you with a new experience in examining a book.

Woodrow Harker:

In this era globalization it is important to someone to find information. The information will make a professional understand the condition of the world. The health of the world makes the information simpler to share. You can find a lot of recommendations to get information example: internet, paper, book, and soon. You will observe that now, a lot of publisher that print many kinds of book. The book that recommended to you personally is Statistics (Made Simple Books) this guide consist a lot of the information of the condition of this world now. That book was represented so why is the world has grown up. The language styles that writer value to explain it is easy to understand. The writer made some study when he makes this book. Here is why this book suitable all of you.

Joseph Yancey:

As a scholar exactly feel bored in order to reading. If their teacher questioned them to go to the library in order to make summary for some e-book, they are complained. Just very little students that has reading's soul or real their interest. They just do what the teacher want, like asked to go to the library. They go to generally there but nothing reading very seriously. Any students feel that reading is not important, boring along with can't see colorful photographs on there. Yeah, it is to be complicated. Book is very important for yourself. As we know that on this time, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore , this Statistics (Made Simple Books) can make you really feel more interested to read.

Ingrid Baumbach:

What is your hobby? Have you heard in which question when you got college students? We believe that that problem was given by teacher with their students. Many kinds of hobby, Everybody has different hobby. Therefore you know that little person such as reading or as reading become their hobby. You need to understand that reading is very important and also book as to be the point. Book is important thing to incorporate you knowledge, except your own teacher or lecturer. You find good news or update regarding something by book. Many kinds of books that can you choose to use be your object. One of them is Statistics (Made Simple Books).
