Chemistry of The Environment R.A. Bailey

Chemistry of the Environment provides a basic level of chemical knowledge on the principles of environmental chemistry and a general understanding of environmental problems. Organized into 17 chapters, this book is developed from the notes for a course in "Chemistry of the Environment" for juniors, seniors, and graduate students in Science and Engineering at Rensselaer Polytechnic Institute.

The opening chapters of this book discuss the problems related to waste disposal and energy production and the principles of atmospheric circulation and photochemical reactions, with an emphasis on the effects of human activities on the atmosphere and climate. Considerable chapters are devoted to various industries, including petroleum chlorinated hydrocarbons, pesticides, heavy metals, and nuclear chemistry, and the contributions of these industries to environmental problems. General topics on both natural and technological processes that impinge on the environment are explored. Other chapters discuss the principles of atmospheric photochemistry and the natural and artificial photochemical processes occurring in the biosphere. This book also examines the chemistry of some of the most important elements and how they relate to the properties of the environment and to biological effects. The concluding chapter provides insights into the nature, as well as the sources and the hazards of ionizing radiation in the environment, with particular emphasis on naturally occurring and artificial nuclear sources of ionizing radiation.

This book is of great benefit to environmental chemists and researchers, biochemists, and elementary organic chemists.

From reader reviews:

Eddie Horton:

Beside this specific Chemistry of The Environment in your phone, it may give you a way to get closer to the new knowledge or info. The information and the knowledge you can get here is fresh from your oven so don't become worry if you feel like an older people live in narrow community. It is good thing to have Chemistry of The Environment because this book offers to your account readable information. Do you at times have book but you rarely get what it's exactly about. Oh come on, that will not happen if you have this inside your hand. The Enjoyable set up here cannot be questionable, including treasuring beautiful island. Use you still want to miss the item? Find this book as well as read it from now!

Pauline Stern:

Don't be worry should you be afraid that this book will probably filled the space in your house, you might have it in e-book way, more simple and reachable. This specific Chemistry of The Environment can give you a lot of good friends because by you checking out this one book you have factor that they don't and make anyone more like an interesting person. This kind of book can be one of a step for you to get success. This publication offer you information that maybe your friend doesn't learn, by knowing more than some other make you to be great people. So , why hesitate? Let's have Chemistry of The Environment.

Athena Thornton:

You can obtain this Chemistry of The Environment by browse the bookstore or Mall. Just simply viewing or reviewing it can to be your solve difficulty if you get difficulties for your knowledge. Kinds of this guide are various. Not only by means of written or printed but additionally can you enjoy this book simply by e-book. In the modern era such as now, you just looking by your mobile phone and searching what your problem. Right now, choose your own personal ways to get more information about your guide. It is most important to arrange yourself to make your knowledge are still revise. Let's try to choose proper ways for you.

Cesar Ford:

As a pupil exactly feel bored to be able to reading. If their teacher requested them to go to the library or make summary for some book, they are complained. Just small students that has reading's internal or real their leisure activity. They just do what the trainer want, like asked to go to the library. They go to there but nothing reading very seriously. Any students feel that studying is not important, boring in addition to can't see colorful images on there. Yeah, it is to get complicated. Book is very important for you personally. As we know that on this period, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore , this Chemistry of The Environment can make you feel more interested to read.
